living here

and here we are,  
your royal chambers!

Oh? Did you

You'll be spending  
the rest of your life

I will not see our  
legacy defiled  
by this...

Perhaps I ought to

make an  
example of it

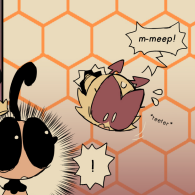

Stop!

Please!

Anything  
but—

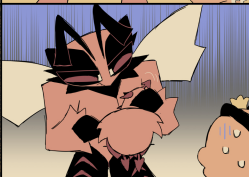

Oh?

What's this?

Another  
little  
bundle  
of joy?

Let's  
take a

Carry on.

I think I'll name you...  
Basil.

Basil... you love your mommy, right?

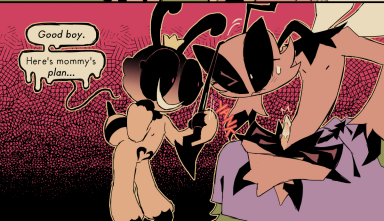

Anything, mother...

You'd do anything for me, right?

Good boy.

Here's mommy's plan...

This is your place, girl.

Beneath me—

Did you... hear something?

P-please, my...

As you wish.

Enjoying  
yourself,  
my—

<sup>precise</sup>  
Why'd you  
stop, *Daddy*?

STUPID JAX!!

STUPID  
HIVE!!!

STUPID ME FOR  
EVER TRUSTING  
YOU!!!

... Cecil would  
have wanted  
this, right?...

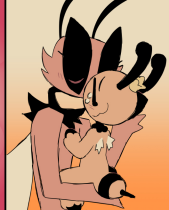

I'm still a good girl

right...?

It is done,  
mother...

Larva

## Workers

Worker bees are the most common type of honeybee. They're responsible for gathering and processing nectar, honeycomb creation and maintenance, and production of royal jelly (though they're strictly forbidden from eating it themselves).

All worker bees are infertile females.

Juvenile

Stingers are shorter than drones', with a maximum of a single barb.

Adult

## Drones

Larva

Juvenile

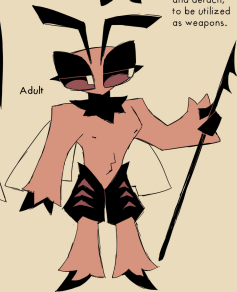

Queens often keep a reverse harem of their favorite drones.

Their stingers can extend and detach, to be utilized as weapons.

Larva (Princess)

Larva (Worker)

Every hive has a lone Queen bee. She's solely responsible for maintaining the hive's population of workers and drones. As such, hives are very protective of their Queen, even gnawing off her wings to ensure she can't fly off.

Natural Queen larva, known as "Princesses", are born only rarely. They fly off in a "swarm" of other bees once mature, splitting the hive population.

It's possible to force a normal worker larva to develop into a Queen by feeding it royal jelly, but this should only be done in emergencies, as this Queen will likely be physically stunted.

# Author's Note

Hello again, everyone! Thank you so much for reading Elysium. It's my first solo original project ever, and it was a lot of fun for me to make (for 49 days straight)! I hope it was also fun for you to read (and that it made sense). :)

This is a markedly different... everything from my usual affair, I think, so it was an interesting change of pace. I've had Jax, Cecil, and Amy lying around unused for several years by this point, and I figured I'd do something with them. So I did!

I actually did a ton of research about bees for this project... then proceeded to completely disregard most of it. I'm here to have fun, not be scientifically accurate! Did you know earwigs just kind of hang out harmlessly in beehives sometimes? They're actually very sweet and maternal bugs! I interpreted them as dog-like for my purposes.

Also, honeybees only eat pollen and nectar, so I think it's hilarious if Jax had some serious indigestion after eating Amy and Cecil's firstborn.

I had a lot of help from several friends along the way while making this, and I'm very grateful! This story wouldn't have been the same without all of you ♡

I think most, if not all, of my future comic projects will be original from this point onward. I still adore OK K.O.I, and it will always be special to me, but I wanna explore my own stuff! Make my own food! Curse other people's dicks!

I'm excited for the future, but as of now, I'll be taking a well-deserved break from comics. Elysium was exhausting to make!

Until next time, you can find me on Twitter and Baraag at @teebnsfw, and Itch.io + Twitter at @teebly.

By the way, I'd really appreciate it if you didn't re-upload this comic, or any others I've made. Thanks, I love you! Bye for now!

Thanks for reading!
